

**CONTRA COSTA ELECTRIC
FACILITIES MAINTENANCE**

Reduce Disruptions and Preserve Capital Investment

Contra Costa Electric
An EMCOR Company

Contra Costa Electric combines broad commercial electrical services industry expertise with a strong commitment to quality service. **We have been providing electrical services since 1946.**

Regular preventive maintenance is critical for a successful building management program—it helps preserve the initial capital investment in both buildings and equipment, while enhancing the sustainability and comfort of facilities.

Successful preventive maintenance programs also help determine overall operating costs and reduce disruptions caused by emergency repairs, or by equipment that must be replaced after it has broken down.

Contra Costa Electric works closely with clients to develop a comprehensive preventive maintenance program that fits a facility's specific needs. We staff the most proficient and skilled IBEW-trained and-certified electricians and equip them with cutting-edge technology to help ensure clients receive industry-leading maintenance service.
